

Build your business through strategic reporting & effective cost management with industry specific products from the Microsoft Dynamics range.....

- Q.** Does the inadequate reporting capability of your current accounting & business management system mean that you do not fully understand business performance within your construction company?
- Q.** Are you able to proactively manage your business commitments or have you outgrown the limitations of your current accounting system?
- Q.** Is your current system frustrating, does it cost time and money and make it difficult to make strategic, sensible decisions for the future?

The Benefits of Microsoft Dynamics NAV to construction companies:

- * 'Out of the box', fixed cost, rapid implementation with few, or no, modifications necessary.
- * Multi-dimensional reporting... enquire & report on multiple entities, for example, via divisions, projects and cost centres.
- * Consolidated reporting for these entities e.g. for bank reports.
- * Inter-company transactions – all in one database.
- * Accurately trace import pricing for inventories.
- * Trace import charges through to projects.
- * Project cost management for draw down billing to banks and/or lead contractors.
- * Save time on reporting & drill down, with clarity, to where the \$'s are spent.
- * Multiple storage areas for Inventory to better manage internal & external sales.

The Special Offer:

A Free Microsoft Construction Industry Information Pack. The pack contains a Microsoft Dynamics NAV demo DVD, a free seminar coupon for a construction industry software seminar course at Microsoft and a free construction industry software selection booklet.
